Tools	Git, Eclipse, Vim
OS	CentOS, Ubuntu, Debian, Windows, Windows Server

ABOUT ME

I am a graduate in Computer Software Engineering at the University of Oviedo (Spain). I especially enjoy databases and software development in general, no matter what language or framework, it's nice to learn new things. I'm used to working under agile methodologies, handling multiple task at the same time.

I would like to bring creativity to the team, as well as not just software, but personal development.

Whether it's about public speaking or presentations, development or project management, I always manage to handle myself doing my best.
